PETER KLARE

HOME FURNISHINGS

OCTOBER 24 - NOVEMBER 28, 1998

Deitch Projects is pleased to present *Home Furnishings*, a painting installation by Peter Klare, in its Storefront Gallery. The artist describes his work as follows:

The subject of my art work is lower middle-class furniture of western culture.

Pieces of furniture are objects men build to surround themselves with, in order to make life more comfortable.

They contain information about being human and about western culture. In a certain way they contain the rules of how we think and how we structure the world we live in. They even represent the way we look at our environment.

In my art work I am changing the usual perspective on pieces of furniture, in order to reveal the aspects of structure, thinking and esthetics of our culture.

Peter Klare was born in Jena, Germany in 1969. He completed the MFA program in painting at UCLA in June 1998. His work has been exhibited in Munich, Germany, Übermain Gallery in Los Angeles and Derek Eller Gallery in New York.
